

1/6/2020

WEEKLY HOLDING LEVEL & USAGE UPDATE

Tasmanian Irrigation will update this table weekly each Monday and post on our website so that our irrigators are able to access information about holding levels on the South East Irrigation Schemes Stages Two and Three.

Daisy Bank Dam – South East Irrigation Scheme Stage Two

	As at 8am
Total Inflow last week	21.2 ML
- TasWater	21.2 ML
- Richmond Pump Station	0 ML
Usage last week	9.91 ML
Dam level today	160.52 ML
Total capacity	172 megalitres
Scheme volume	1980 megalitres

Rekuna Dam – South East Irrigation Scheme Stage Three

	As at 8am
Total Inflow last week	0 ML
Usage last week	10.12 ML
Dam level today	172.07 ML
Total capacity	195 megalitres
Scheme volume	3000 megalitres

NOTE: Both Rekuna and Daisy Banks Dams are holding dams, which provide a buffer to manage variations in inflows and usage.

Tasmanian Irrigation sincerely thanks all South East irrigators for their ongoing observation of current restriction levels and for working cooperatively with us to restore dam buffer levels to provide much needed irrigation water surety.

We appreciate everyone's efforts to conserve water – both at work and at home. Please contact us, or your Irrigator Representative Committee, at any time if you require further information.

Andrew
