WEEKLY HOLDING LEVEL & USAGE UPDATE

Tasmanian Irrigation will update this table weekly each Monday and post on our website so that our irrigators are able to access information about holding levels on the South East Irrigation Schemes Stages Two and Three.

Daisy Bank Dam – South East Irrigation Scheme Stage Two

	As at 8am
Total Inflow last week	51.34 ML
- TasWater	51.34 ML
- Richmond Pump Station	0 ML
Usage last week	57.59 ML
Dam level today	159.52
Total capacity	172 megalitres
Scheme volume	1980 megalitres

Rekuna Dam – South East Irrigation Scheme Stage Three

	As at 8am
Total Inflow last week	72.77 ML
Usage last week	64.37 ML
Dam level today	195.8 ML
Total capacity	195 megalitres
Scheme volume	3000 megalitres

NOTE: Both Rekuna and Daisy Banks Dams are holding dams, which provide a small buffer to manage variations in inflows and usage.

Tasmanian Irrigation are continuously managing the water supply to irrigators. However, we are reliant on fluctuating volumes from TasWater, we may from time to time be required to limit your allocation for a period. We will advise you via text message and email when, and if, this does occur. We sincerely thank all South East irrigators for their collaboration in this effort to provide water to all irrigators.

We appreciate everyone's efforts to conserve water – both at work and at home. Please contact us, or your Irrigator Representative Committee, at any time if you require further information.

Andrew
