Notes to assist completion of the Preliminary Expression of Interest (EOI)

- Submitting a completed EOI will assist TI to determine interest in an irrigation scheme in your community;
- You do not necessarily need river frontage to access TI water; it may be possible to pipe water to your property;
- The information that you provide will be confidential and will only be used for the purposes of progressing the investigation into the scheme;
- Indicate your likely maximum realistic water requirements (in MLs) per annum;
- Tranche Three irrigation schemes will involve an irrigator contribution of a minimum of $1390 per ML or 25 per cent of the capital cost, whichever is the greater. The final contribution for SEIS will be determined by a number of factors. As a guide, water entitlements last sold in the SEIS region for $2,700/ML in the Stage Three area sales launch in 2012;
- Annual fixed and variable operational charges are also applicable for each ML of water entitlement held. TI’s current water charges for the existing Stage Three SEIS are listed on TI’s website and provide an indication of the expected operation charges for future SEIS entitlements;
- It is important that you indicate the water requirements for each property you own and to clearly identify each property with its Property Identification Number (PID) and address. The PID is listed on your rates notice and is a seven digit number. It is unique to your property; and
- If you have more than one property and they are geographically separated, please list each individual property.
